

NWP-Seminar

Date: 25 October
Time: 14h00 (CEST)
Place: MeteoSwiss, Zurich Airport, OPC 1, Room 5-331
Online: see Microsoft Teams link at the bottom of this text

Krishnamoorthy Chandramouli: Satellite data assimilation in NWP systems

Satellite based observations play an important role in a NWP system by providing passive observations of temperature, humidity etc. over the data sparse regions of the domain. Past studies have demonstrated that in addition to the global NWP system, both regional and convective scale NWP systems have benefitted from satellite observations. As an introductory seminar, I will share some of my limited experiences working on data assimilation of satellite observations.

External guests: If you wish to attend, please send a short note as a reply to this mail.

Katrin.Ehlert@meteoswiss.ch

Please arrive at the reception desk at the Operations Center 1 Entrance A no later than 10 minutes before the start of the seminar and ask for name of the organiser of the NWP Seminar (normally the person who distributed this invitation). You will be picked up at the entrance.
