

Research Output 1999-2024

1. Articles in Scientific Journals [peer-reviewed]

2001

[1] Kljun, N., **M. Sprenger**, and C. Schär, 2001: Frontal modification and lee cyclogenesis in the Alps: A case study using the ALPEX reanalysis data set. *Meteorology and Atmospheric Physics*, Vol. 78, 89-105.

[2] **Sprenger, M.**, and C. Schär, 2001: Rotational aspects of stratified gap flows and shallow föhn. *Quarterly Journal of the Royal Meteorological Society*, Vol. 127, 161-187.

[3] Schnabel, C., J. M. Lopez-Gutierrez, S. Szidat, **M. Sprenger**, H. Wernli, J. Beer, and H.-A. Synal, 2001: On the origin of ^{129}I in rain water near Zürich. *Radiochimica Acta*, Vol. 89, 815-822.

2002

[4] Benoit, R., C. Schär, P. Binder, S. Chamberland, H.C. Davies, M. Desgagné, C. Girard, C. Keil, N. Kouwen, D. Lüthi, D. Maric, E. Müller, P. Pellerin, J. Schmidli, F. Schubiger, C. Schwierz, **M. Sprenger**, A. Walser, S. Willemse, W. Yu, and E. Zala, 2002: The Real-Time Ultrafinescale Forecast Support during the Special Observing Period of the MAP. *Bulletin of the American Meteorological Society*, Vol. 83, 85–110.

2003

[5] Cristofanelli, P., P. Bonasoni, W. Collins, J. Feichter, C. Forster, P. James, A. Kentarchos, P. W. Kubik, C. Land, J. Meloen, G. J. Roelofs, P. Siegmund, **M. Sprenger**, C. Schnabel, A. Stohl, L. Tobler, L. Tositti, T. Trickl, and P. Zanis, 2003: Stratosphere-to-troposphere transport: A model and method evaluation. *Journal of Geophysical Research*, Vol. 108, 8525,

[6] Meloen, J., P. Siegmund, P. van Velthoven, H. Kelder, **M. Sprenger**, H. Wernli, A. Kentarchos, G. Roelofs, J. Feichter, C. Land, C. Forster, P. James, A. Stohl, W. Collins, and P. Cristofanelli, 2003: Stratosphere-troposphere exchange: A model and method intercomparison, *Journal of Geophysical Research*, Vol. 108, 8526.

[7] Schär, C., **M. Sprenger**, D. Lüthi, Q. Jiang, R. B. Smith, and R. Benoit, 2003: Structure and dynamics of an Alpine potential-vorticity banner. *Quarterly Journal of the Royal Meteorological Society*, Vol. 129, 825–855.

[8] **Sprenger, M.**, and H. Wernli, 2003: A northern hemispheric climatology of cross-tropopause exchange for the ERA15 time period (1979–1993). *Journal of Geophysical Research*, Vol. 108, 8521, doi:10.1029/2002JD002636, D12.

[9] **Sprenger, M.**, M. Croci Maspoli, and H. Wernli, 2003: Tropopause folds and cross-tropopause exchange: A global investigation based upon ECMWF analyses for the time period March 2000 to February 2001. *Journal of Geophysical Research*, Vol. 108, 8518, doi:10.1029/2002JD002587, D12.

[10] Stohl, A., P. Bonasoni, P. Cristofanelli, W. Collins, J. Feichter, A. Frank, C. Forster, E. Gerasopoulos, H. Gäggeler, P. James, T. Kentarchos, H. Kromp-Kolb, B. Krüger, C. Land, J. Meloen, A. Papayannis, A. Priller, P. Seibert, **M. Sprenger**, G. J. Roelofs, H. E. Scheel, C. Schnabel, P. Siegmund, L. Tobler, T. Trickl, H. Wernli, V. Wirth, P. Zanis, and C. Zerefos, 2003: Stratosphere-troposphere exchange: A review, and what we have learned from STACCATO. *Journal of Geophysical Research*, Vol. 108, 8516, doi:10.1029/2002JD002490, D12.

[11] Stohl, A., H. Wernli, P. James, M. Bourqui, C. Forster, M. A. Liniger, P. Seibert, and **M. Sprenger**, 2003: A New Perspective of Stratosphere-Troposphere Exchange. *Bulletin of the American Meteorological Society*, Vol. 84, 1565–1574, doi: 10.1175/BAMS-84-11-1565.

2004

[12] Flamant, C., E. Richard, C. Schär, R. Rotunno, L. Nance, **M. Sprenger**, and R. Benoit, 2004: The wake south of the Alps: Dynamics and structure of the lee-side flow and secondary potential vorticity banners. *Quarterly Journal of the Royal Meteorological Society*, Vol. 130, 1275–1303.

2006

[13] Guerova, G., I. Bey, J.-L. Attié, R. V. Martin, J. Cui, and **M. Sprenger**, 2006: Impact of transatlantic transport episodes on summertime ozone in Europe. *Atmospheric Chemistry and Physics*, Vol. 6, 2057-2072, doi: 10.5194/acp-6-2057-2006.

2007

[14] Bonasoni, P., P. Laj, F. Angelini, J. Arduini, U. Bonafè, F. Calzolari, P. Cristofanelli, S. Decesari, M. C. Facchini, S. Fuzzi, G. P. Gobbi, M. Maione, A. Marinoni, A. Petzold, F. Roccato, J. C. Roger, K. Sellegri, **M. Sprenger**, H. Venzac, G. P. Verza, P. Villani, and E. Vuillermoz, 2007: The ABC-Pyramid Atmospheric Research Observatory in Himalaya for aerosol, ozone and halocarbon measurements. *Science of the Total Environment*, Vol. 391, 252-261.

[15] Jaeger, E. B., and **M. Sprenger**, 2007: A Northern Hemispheric climatology of indices for clear air turbulence in the tropopause region derived from ERA40 reanalysis data. *Journal of Geophysical Research*, Vol. 112, D20106, doi: 10.1029/2006JD008189.

[16] **Sprenger, M.**, H. Wernli, and M. Bourqui, 2007: Stratosphere-Troposphere Exchange and Its Relation to Potential Vorticity Streamers and Cutoffs near the Extratropical Tropopause. *Journal of the Atmospheric Sciences*, Vol. 64, 1587–1602, doi: 10.1175/JAS3911.1.

[17] Wernli, H. and **M. Sprenger**, 2007: Identification and ERA-15 Climatology of Potential Vorticity Streamers and Cutoffs near the Extratropical Tropopause. *Journal of the Atmospheric Sciences*, Vol. 64, 1569–1586, doi: 10.1175/JAS3912.1.

2008

[18] Isotta, F., O. Martius, **M. Sprenger**, and C. Schwierz, 2008: Long-term trends of synoptic-scale breaking Rossby waves in the Northern Hemisphere between 1958 and 2001. *International Journal of Climatology*, Vol. 28, 1551–1562, doi: 10.1002/joc.1647.

[19] Martius, O., C. Schwierz, and **M. Sprenger**, 2008: Dynamical tropopause variability and potential vorticity streamers in the Northern Hemisphere — A climatological analysis. *Advances in Atmospheric Sciences*, Vol. 25, 367-380.

- [20] Nieto, R., **M. Sprenger**, H. Wernli, R. M. Trigo, and L. Gimeno, 2008: Identification and Climatology of Cut-off Lows near the Tropopause. *Annals of the New York Academy of Sciences*, Vol. 1146, 256–290. doi:10.1196/annals.1446.016.

2009

- [21] Cristofanelli, P., P. Bonasoni, U. Bonafé, F. Calzolari, R. Duchi, A. Marinoni, F. Roccato, E. Vuillermoz, and **M. Sprenger**, 2009: Influence of lower stratosphere/upper troposphere transport events on surface ozone at the Everest-Pyramid GAW Station (Nepal): first year of analysis. *International Journal of Remote Sensing*, Vol. 30, 4083-4097, doi: 10.1080/01431160902821940.

- [22] Cui, J., **M. Sprenger**, J. Staehelin, A. Siegrist, M. Kunz, S. Henne, and M. Steinbacher, 2009: Impact of stratospheric intrusions and intercontinental transport on ozone at Jungfraujoch in 2005: comparison and validation of two Lagrangian approaches. *Atmospheric Chemistry and Physics*, Vol. 9, 3371-3383, doi:10.5194/acp-9-3371-2009.

- [23] Jaeger, E. B. and **M. Sprenger**, 2009: Vorticity, deformation and divergence signals associated with stratosphere–troposphere exchange. *Quarterly Journal of the Royal Meteorological Society*, Vol. 135, 1684–1696, doi:10.1002/qj.482.

2010

- [24] Bonasoni, P., P. Laj, A. Marinoni, **M. Sprenger**, F. Angelini, J. Arduini, U. Bonafè, F. Calzolari, T. Colombo, S. Decesari, C. Di Biagio, A. G. di Sarra, F. Evangelisti, R. Duchi, M. C. Facchini, S. Fuzzi, G. P. Gobbi., M. Maione, A. Panday, F. Roccato, K. Sellegri, H. Venzac, G. P. Verza, P. Villani, F. Vuillermoz, and P. Cristofanelli, 2010: Atmospheric Brown Clouds in the Himalayas: first two years of continuous observations at the Nepal Climate Observatory-Pyramid (5079 m). *Atmospheric Chemistry and Physics*, Vol. 10, 7515-7531, doi:10.5194/acp-10-7515-2010.

- [25] Cristofanelli, P., A. Bracci, **M. Sprenger**, A. Marinoni, U. Bonafè, F. Calzolari, R. Duchi, P. Laj, J. M. Pichon, F. Roccato, H. Venzac, E. Vuillermoz, and P. Bonasoni, 2010: Tropospheric ozone variations at the Nepal Climate Observatory-Pyramid (Himalayas, 5079 m a.s.l.) and influence of deep stratospheric intrusion events. *Atmospheric Chemistry and Physics*, Vol. 10, 6537-6549, doi:10.5194/acp-10-6537-2010.

- [26] Jenkner, J., **M. Sprenger**, I. Schwenk, C. Schwierz, S. Dierer, and D. Leuenberger, 2010: Detection and climatology of fronts in a high-resolution model reanalysis over the Alps. *Meteorological Applications*, Vol. 17, 1-18, doi: 10.1002/met.142.

- [27] Schlemmer, L., O. Martius, **M. Sprenger**, C. Schwierz, and A. Twitchett, 2010: Disentangling the Forcing Mechanisms of a Heavy Precipitation Event along the Alpine South Side Using Potential Vorticity Inversion. *Monthly Weather Review*, Vol. 138, 2336–2353, doi:10.1175/2009MWR3202.1.

- [28] Trickl, T., H. Feldmann, H.-J. Kanter, H.-E. Scheel, **M. Sprenger**, A. Stohl, and H. Wernli, 2010: Forecasted deep stratospheric intrusions over Central Europe: case studies and climatologies. *Atmospheric Chemistry and Physics*, Vol. 10, 499-524, doi:10.5194/acp-10-499-2010.

- [29] Kew, S. F., **M. Sprenger**, and H. C. Davies, 2010: Potential Vorticity Anomalies of the Lowermost Stratosphere: A 10-Yr Winter Climatology. *Monthly Weather Review*, Vol. 138, 1234–1249, doi:10.1175/2009MWR3193.1.

2011

- [30] Cui, J., S. Pandey Deolal, **M. Sprenger**, S. Henne, J. Staehelin, M. Steinbacher, and P. Nédélec, 2011: Free tropospheric ozone changes over Europe as observed at Jungfraujoch (1990–2008): An analysis based on backward trajectories. *Journal of Geophysical Research*, Vol. 116, D10304, doi:10.1029/2010JD015154.
- [31] Graf, M., **M. Sprenger**, and R. Moore, 2011: Central European tornado environments as viewed from a potential vorticity and Lagrangian perspective. *Atmospheric Research*, Vol. 101, 31–45.
- [32] Trickl, T., N. Bärtsch-Ritter, H. Eisele, M. Furger, R. Mücke, **M. Sprenger**, and A. Stohl, 2011: High-ozone layers in the middle and upper troposphere above Central Europe: potential import from the stratosphere along the subtropical jet stream. *Atmospheric Chemistry and Physics*, Vol. 11, 9343–9366, doi:10.5194/acp-11-9343-2011.

2012

- [33] Bracci, A., P. Cristofanelli, **M. Sprenger**, U. Bonafè, F. Calzolari, R. Duchi, P. Laj, A. Marinoni, F. Roccato, E. Vuillermoz, and P. Bonasoni, 2012: Transport of Stratospheric Air Masses to the Nepal Climate Observatory–Pyramid (Himalaya; 5079 m MSL): A Synoptic-Scale Investigation. *Journal of Applied Meteorology and Climatology*, Vol. 51, 1489–1507.

2013

- [34] Béguin, A., O. Martius, **M. Sprenger**, P. Spichtinger, D. Folini, and H. Wernli, 2013: Tropopause level Rossby wave breaking in the Northern Hemisphere: a feature-based validation of the ECHAM5-HAM climate model. *International Journal of Climatology*, Vol. 33, 3073–3082.

[15] Kurzer Auftritt in 'Im Bann des Föhns - Geschichten vom geheimnisvollen Südwind', ein Film von Theo Stich (Kinostart 9. März 2017). Kurzbeschrieb des Dokumentarfilms: "Das neue Werk des Dokufilmers Theo Stich rückt ein wahres «Mysterium der Alpen» ins Zentrum: den Föhn. Seit jeher bestimmt er das Leben der Alpenländer. Auch in der Schweiz. Mal mehr, mal weniger. Wie die Menschen gelernt haben, mit ihm zu leben und welche positiven Aspekte man dem warmen Südwind abgewinnen kann, erzählt **Im Bann des Föhns**. Der aufschlussreiche Film zeigt die Vielseitigkeit eines nicht zu bändigen Naturphänomens, das bis heute Rätsel aufgibt." (www.cineman.ch)

[38] Berechnung von Trajektorien zum Projekt ‘**PURE AIR**’ von Khalil Berro (khalilberro.com/pure-air-1), 2023/2024. Projektbeschrieb: “PURE AIR comprises nine SCBA air tanks used by firefighters seeking to breathe non-toxic, clean air in polluted environments. Khalil Berro and his team transported these cylinders to various seemingly untouched locations in the Alps, representative for the general visual concept of nature, facilitating an exchange not only of air but also of culture and atmospheric pressure. Each cylinder has been filled with air from one of nine distinct remote locations, transforming them into time capsules that encapsulate our current atmospheric conditions for future generations. Alongside the exchange and capture of air, trajectory calculations of air parcels were made by Dr. **Michael Sprenger** at the Institute for Atmospheric and Climate Science at ETH Zurich, led by Prof. Dr. Heini Wernli. The histories and past positions of the collected air samples are calculated and visualized, fostering a new comprehension of the interrelated dynamics within our global systems and the profound interconnectedness of all life facilitated by the presence of air.”

[39] Turbulenz und Klima, 2024: Medienanfrage (Tagesanzeiger) von Martin Läubli zu Clear Air Turbulence.

[40] Berechnung von Trajektorien, Erstellen eines Lauftextes, Mitgestaltung der Webseite für das Projekt ‘**BREATHE**’ von Khalil Berro (khalilberro.com/breathe), 2024. Projektbeschrieb: “As you breathe in and feel the air coursing down into your lungs, the origins of this air are often disregarded unless catastrophic events such as volcanic eruptions or radioactive fallout demand increased awareness. Through the calculation of air parcels from each exhibition space, the historical journey of every person's breath present is tracked and simultaneously constructed. This mixture of imagination and scientific data is fuelled by real-time calculations conducted by Dr. **Michael Sprenger** and Dr. Hanna Joos at the Institute for Atmospheric and Climate Science, ETH Zurich, led by Prof. Dr. Heini Wernli. The results of these calculations, delineating the air's journey, complete with city names and timestamps – are projected onto multiple facades across Europe. The scrolling text, reminiscent of stock tickers cascading across Wall Street skyscrapers, echoes the ambiance of high-stakes trading.” BREATHE is shown at: NOI Tech Park, Bolzano, Italy (13/06/2025-09/08/2024); Washington D.C, Soirée Suisse (18/09/2024); ETH Hauptgebäude, Zurich, Switzerland (26/09/2024-25/10/2024). - [11] Franco, L. and **M. Sprenger**, 2023: Synoptic Weather Systems and Clear Air Turbulence (CAT). The Aerospace Human Factors Research Division (AHFRD) New and Emerging Aviation Technologies (NEAT), Federal Aviation Administration “New and Emerging Aviation Technologies” (NEAT) Virtual Presentation, 7 November 2023 [invited presentation, via Zoom].

4. Organisation of Workshops and Conferences / Activities at conferences

- [1] Annual Meeting of the **Swiss Meteorological Society**, Bern, 17 November 2012; ca. 40 participants.
- [2] Annual Meeting of the **Swiss Meteorological Society**, Lausanne, 16 November 2013; ca. 20 participants.
- [3] **Deutsch-Österreichisch-Schweizerische Meteorologentagung (DACH)**, 2-6 September 2013, Innsbruck, Austria; Convenor of a Session on mountain meteorology.
- [4] **32th International Conference on Alpine Meteorology (ICAM)**, 3 – 7 June 2013, Kranjska Gora, Slovenia; Session Convenor on downlope wind systems.
- [5] Annual Meeting of the **Swiss Meteorological Society**, Zürich, 8 November 2014; ca. 60 participants.
- [6] **14th Annual Meeting of the European Meteorological Society & 10th European Conference on Applied Climatology (ECAC)**, 6-10 October 2014, Prague, Czech Republic; Convenor of a Session on mountain meteorology.
- [7] Annual Meeting of the **Swiss Meteorological Society**, Zürich, 7 November 2015; ca. 60 participants.
- [8] **33th International Conference on Alpine Meteorology (ICAM)**, 31 August – 4 September 2015, Innsbruck, Austria; Member of Programme Committee & Session Convenor on dynamically driven mountain flows.
- [9] Annual Meeting of the **Swiss Meteorological Society**, Zürich, 25 November 2016; ca. 60 participants.
- [10] Bi-annual meeting of the **Arbeitgemeinschaft Föhnforschung Rheintal/Bodensee (AGF)**, Zürich, 3 May 2017; ca. 15 participants [co-organized with B. Dürr, D. Gerstgrasser].

[11] Annual Meeting of the **Swiss Meteorological Society**, Zürich, 10 November 2017; ca. 60 participants.

[12] Organisation of a '**Media and Climate Communication Workshop**' with Beat Glogger from scitec-media, Zurich, 14 September 2017. The workshop was jointly organized by the Swiss Meteorological Society (SGM) and the Center for Climate System Modeling (C2SM); 27 participants.

[13] Annual Meeting of the **Swiss Meteorological Society**, Bern, 23 November 2018; ca. 60 participants.

[14] Workshop on **Aviation Meteorology**, Winterthur, 27 May 2019. Organized together with ZHAW (Julien Anet) and MeteoSwiss (Marco Stoll); 75 participants.

[15] Annual Meeting of the **Swiss Meteorological Society**, Zürich, 8 November 2019; ca. 50 participants.

[16] **35th International Conference on Alpine Meteorology (ICAM)**, 2-6 September 2019, Riva del Garda, Italy: Member of Programme Committee & Session Convenor on dynamically driven mountain flows.

[17] Virtual (Zoom) Mini-Workshop '**Clear Air Turbulence & Aircraft Icing**', 29 April 2020, 11 participants from MeteoSwiss, SWISS and ETH.

[18] **35th International Conference on Alpine Meteorology (ICAM)** - Online with Qiqochat and Zoom (www.icam2023.ch/online-event-2021); co-organisation with L. Jansing (IAC) and MeteoSwiss (Marco Arpagaus, Seda Durmus, Sophie Storrer), six invited presentations and four topical discussion sessions, ~170 participants.

[19] Hosting at ETH the bi-annual meeting of the **Arbeitgemeinschaft Föhnforschung Rheintal/Bodensee (AGF)**, Zürich, 2 May 2022 [co-organized with B. Dürr, D. Gerstgrasser].

[20] **36th International Conference on Alpine Meteorology (ICAM)** – 19 to 23 June St. Gallen, Switzerland, and Poster Session (Gather.town) on-line 27 June 2023; chair of programme committee; co-organisation with L. Jansing (IAC) and MeteoSwiss (M. Arpagaus), eight invited presentations and eight topical sessions, ~90 oral and ~90 poster presentations; 160 registered participants (general website: www.icam2023.ch / programme website: www.iacweb.ethz.ch/events/icam2023/programme.htm).

[21] Eintägiges **Symposium der Schweizerischen Gesellschaft für Meteorologie (SGM)** "**Verrücktes Wetter**" 20 March 2024, 120 participants, Siemens-Auditorium, ETH Hönggerberg. Moderierte Gesprächsrunde, Vorträge, Podiumsdiskussion. Organisiert zusammen mit T. Schnadt (C2SM), S. Kotlarski (Meteoschweiz), N. Glaus (Umweltbeauftragte Hängegleiterverband), Helene Barras (MeteoSchweiz), Y. Brugnara (EMPA).
